

The Capital-Allocator Atlas

79 allocators outside the unicorn-venture model, classified by asset class: **SMV**, **Nimble**, **Permanent**, **Studio** (plus a reserved Sovereign/Operator holding set). Each verified on its own words.

55 tech · 24 mixed. Permanent dominates; SMV and Studio are the thin growth targets. **Tier** (verified / anchor / in-disguise / provenance) is shown per card and is orthogonal to asset class.  sector-pending entities (no on-page sector description) sit at the bottom of their class, not yet approvable.

SMV

SMV Capital 2

Small-to-medium venture — equity targeting venture-scale, non-unicorn \$50M–500M outcomes (not defined by capital-efficiency).

Cornerstone Ventures

IN DISGUISE

INDIA

TECH

Success here isn't about finding the one unicorn that returns the fund ten times over—it's about building a portfolio where 10-15 companies deliver solid 3-5x returns, with a handful achieving 10-15x outcomes.

www.cornerstoneventures.vc/pressblogs/049-venture-capital-investing-mindset-understanding-india-s-strategic-approach

Pemba Capital Partners

IN DISGUISE

AUSTRALIA

TECH

Instead of the unicorn, the camel is the more fitting mascot for what we look for.

pemba.com.au/hunt-camels-rather-than-unicorns

Nimble

Nimble Capital 21

Capital-efficient, small capital, quick realization — non-dilutive / revenue-based / micro, plus capital-efficient equity VCs.

4D Ventures

IN DISGUISE

EUROPE

TECH

Besides vision, we are a great fit with founders with a bootstrap mentality (we are no fit for 'blitz-scalers'), low-burn yet ambitious.

www.4d.ventures/investment-thesis

Bigfoot Capital

TECH

We started Bigfoot in 2017 to push back against what we viewed to be an overly pervasive and often reckless format for building and capitalizing software businesses, that of growth at all costs and the associated hyperfunding to pursue it.

bigfootcap.com

BuenTrip Ventures

IN DISGUISE

LATAM

MIXED

We seek founders who can achieve outsized results with limited capital by focusing on profitability and efficient scaling.
