

The Post-Unicorn Finance Atlas

New-taxonomy classification snapshot · 2026-06-08 · 139 asset-classified + 0 under review · 125 with verbatim self-ID quotes

Read me first - this is a current-state snapshot, not the final report. It reflects the data exactly as classified today. The **SMV / Nimble** split is still by *instrument* and is **pending reconciliation with Ethan** (who defines them by market size + liquidity speed); some rows here may move. **Permanent Capital is 50%** of the set - an archetype concentration we are deliberately working to broaden (this snapshot adds a new **Impact Capital** class). Structure follows Ethan's **"Active Experiments vs Trends / Watch"** directive.

ASSET CLASS	SECTION	COUNT
SMV	Active Experiments	19
Nimble	Active Experiments	25
Permanent	Active Experiments	65
Studio	Active Experiments	13
Impact Capital	Active Experiments	11
Reserved	Trends / Watch	3
Excluded-Traditional	Appendix	3
TOTAL (asset-classified)		139

By evidence tier: verified: 80 · in_disguise: 45 · provenance: 6 · anchor: 5 · self_id: 3

Active Experiments

SMV - Small-to-Medium Venture 19

Equity targeting venture-scale, non-unicorn \$50M-500M outcomes. NOTE: the SMV/Nimble split is currently by instrument and is PENDING reconciliation with Ethan (market-size + exit-speed).
